

# GET MORE OUT OF YOUR SOLAR

WITH A SOLAHART GATEWAY

The smart new way to manage your solar power

 **Solahart**  
ENERGY *Free* FROM THE SUN®

# NEW SOLAHART GATEWAY

Installing solar is a smart way to reduce your energy costs, and create a more sustainable lifestyle. And now, there's a new way to get more out of your solar system by making it even smarter.

Solahart Gateway is an intelligent communications hub that monitors the solar power you generate, and the energy you consume. It identifies household appliances and habits that use large amounts of electricity, and shows you when you're generating the most solar energy.

By adjusting your energy usage behaviour and shifting loads away from expensive peak times, you can maximise the use of your solar energy and further reduce your energy costs.

## WITH A SOLAHART GATEWAY YOU CAN:

- Monitor your system's daily energy production and analyse its performance
- Access your energy data anywhere, anytime
- Reduce energy costs by maximising your solar energy and shifting loads away from expensive peak times
- Coordinate operation of major devices for optimum savings
- Take advantage of up-coming technologies via cloud based updates
- Enjoy peace of mind with a Solahart 3-year warranty

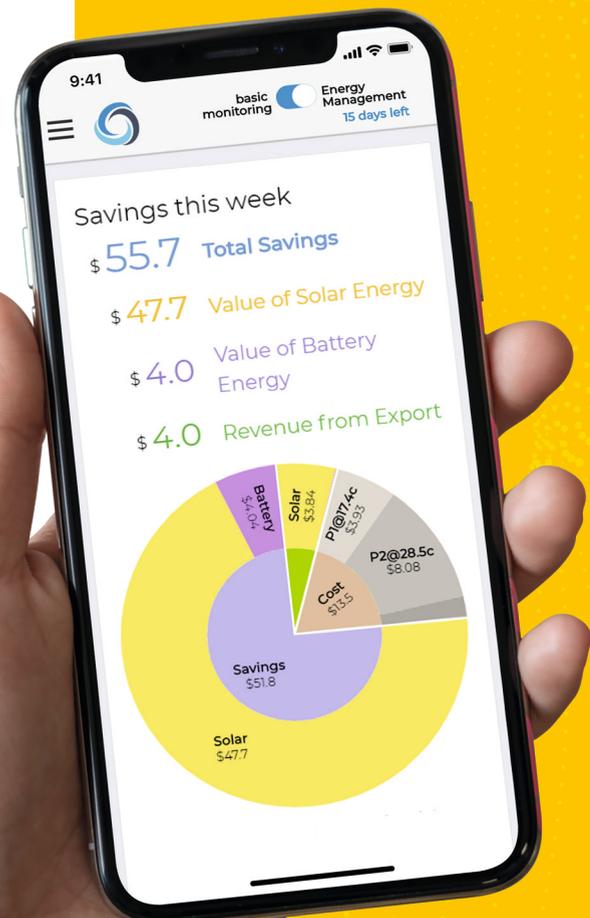

## ADD A SOLAHART GATEWAY TO ANY SOLAR SYSTEM

The Gateway can minimise the overall cost of energy by storing your solar energy in a Solahart PowerStore® hot water system, battery storage system, or by using the Solar Scheduling to intelligently turn on devices when there is excess solar production.

## FUTURE-PROOF YOUR SYSTEM

Because a Solahart Gateway is cloud-adaptable, you can take advantage of up-coming technologies as they become available.

- Control and co-ordinate major household appliances
- Purchase additional power at the lowest tariff rates
- Obtain regular weather updates to help manage your power
- Determine when to run large household appliances
- Make money by being part of a virtual "power plant"
