

SOLAHART COMMERCIAL SOLUTIONS

SOLAR POWER

FREE ENERGY FOR AUSTRALIAN
BUSINESS AND INDUSTRY

 **Solahart**
ENERGY *Free* FROM THE SUN[®]

REDUCE YOUR ENERGY BILLS AND CREATE A MORE SUSTAINABLE BUSINESS

Solahart specialises in solar solutions for businesses large and small. We go to extreme lengths to ensure our systems provide you with worry-free, trouble-free energy for years to come. Don't risk your solar investment. Talk to Solahart today.

FIVE REASONS TO INSIST ON SOLAHART SOLAR POWER FOR YOUR BUSINESS

1. Australia's free energy experts

For over 60 years we've been Australia's most recognised name in solar. We have built our business on trust because we take the time to understand our customers' needs. We use this same approach with commercial, where we still believe in face-to-face contact to better understand your unique situation, review your energy bills and inspect your building. Using our proprietary software tool, the Solahart Savings Calculator, we will then recommend the best system for your budget and your energy consumption patterns. Our solar power systems are only available through authorised Solahart dealers and our professional installers are trained to Solahart's exacting standards, are Clean Energy Council (CEC) accredited, and only use Solahart approved installation components including racking, isolators and enclosures.

2. An unrivalled commitment to quality and testing

All Solahart Solar Power systems are designed and manufactured for the harshest Australian conditions. Quality is ingrained in everything we do and in every component of our systems, from the glass, to the frames, laminates, electronics and roof-mounting systems. Our key components are rigorously tested to ensure minimal energy losses, maximum energy yields, and strength over the life of your system.

3. Greater efficiency and performance for greater savings

Solahart Solar Power systems deliver amazing savings to your business and are a great way to reduce electricity bills because of their superior efficiency and performance. Our Solahart Savings Calculator is an easy way to estimate the savings you will make. Also, by installing a Solahart Solar Power system, you could create a more sustainable business using an energy source that is clean and green.

4. Trusted Solahart warranties

With over 60 years in the solar business, we are here for the long haul. Every Solahart Solar Power system is backed by a trusted Solahart warranty. In the unlikely event of a problem, our team of Solahart dealers will be there to fix it!

5. Competitive leasing options

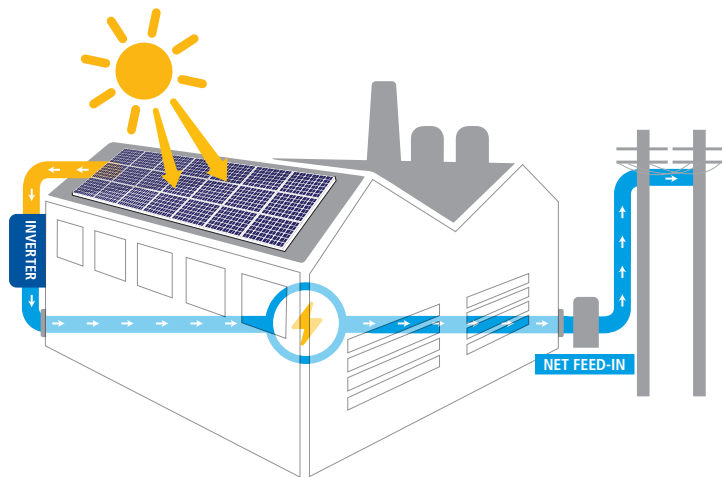

Solahart offers a competitive range of leasing options. If you want to enjoy the immediate benefits of going solar with no deposit and an affordable repayment schedule to minimise the impact on your cash flow, this is a great option to consider.

COMMERCIAL SOLAR POWER THAT IS UNRIVALLED FOR QUALITY

Solahart Solar Power systems deliver unrivalled quality, performance and efficiency. By bringing together world-renowned REC solar panels and a high-performance inverter range, you can be assured that you have a commercial solar power system that is second to none.

How it works for your business

- Photons from the sun are turned into electricity by solar panels
- DC current is converted into 240V AC electricity via an inverter for use by your business (up to 100kW)
- A meter measures the amount of electricity your solar system produces
- Any unused AC power may be sent back to the grid subject to network approval

High-performance SMA inverters

With over 35 years of solar experience, SMA inverters have become the industry standard for the global solar power industry. Their highly efficient energy conversion ensures maximum performance even under extreme ambient conditions, offering a reliable and self-sufficient supply of energy, free from the sun.

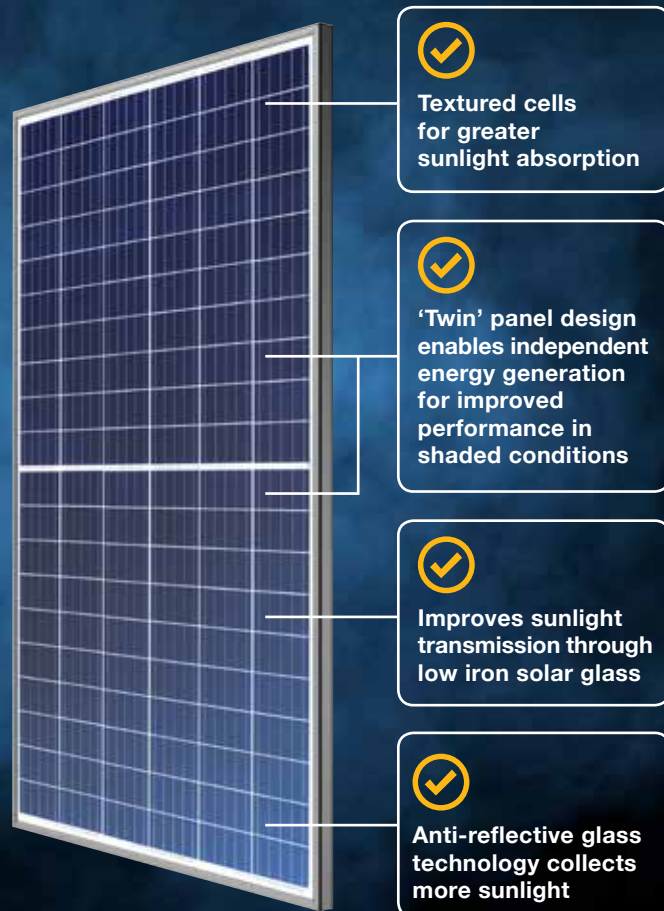

World-leading REC panels

The harsh Australian environment demands quality solar power components. That's why we use world-leading REC solar panels which are consistent with Solahart's quality and performance requirements. REC panels are also a great choice for the environment.

Module Optimised SolarEdge Inverters

SolarEdge entered the commercial inverter market with their range of module-optimised solutions. This technology enables superior power generation and performance monitoring at module level, providing incredible system design flexibility and improved safety. These additional features are making systems more popular in large scale commercial and industrial installations.

WE ONLY USE THE BEST OF THE BEST

REC SOLAR PANELS

Features	How you benefit
✓ Proven in independent testing by Photon and the Fraunhofer Institute to output exceptional power in real world conditions	✓ More power for each watt installed
✓ Superior panel performance in low light and high temperature	✓ Maximises the amount of power generated in varying conditions
✓ Anti-reflective glass technology	✓ Each panel collects more sunlight
✓ Smart design and reliable components	✓ Reduces effect of degradation to ensure reliable ongoing energy generation

SMA INVERTERS

Features	How you benefit
✓ Designed and built with world-leading German technology	✓ Industry-leading efficiency ratings give you more usable power from the system
✓ Transformer-less technology	✓ Improved inverter efficiency so you get more usable power from your system
✓ Web-Connect Cloud-based monitoring platform	✓ Monitor system performance online, from your office PC
✓ Built with wide output range	✓ Improves efficiency in varying light conditions

SOLAREEDGE INVERTERS

Features	How you benefit
✓ Module-level optimisation	✓ Flexible System design to yield improved energy outputs
✓ Full system visibility	✓ Module-level monitoring, reducing operation and maintenance costs
✓ Optimiser safety protection	✓ Improved safety of installation and operation
✓ Cloud-based monitoring platform	✓ Monitor system performance online, from your office PC
