67 % Consumed Energy from Solar
90 % Hot Water Energy from Solar

WITH A SOLAHART ENERGY MANAGEMENT SYSTEM YOU CAN:

- Bring your compatible energy generating devices and connected appliances* under one monitoring and control platform

- Monitor your system's daily energy production and analyse its performance

- Access your energy data, anywhere, anytime through the atHome web App

- Access live information about your home's energy usage and generation via the atHome web App

- Help reduce your home's energy costs by maximising your solar production and shifting high energy consumption connected appliances* from peak electricity grid times

- Take advantage of up-coming technologies via cloud-based updates

- Automatic fault alerts from connected appliances* (solar power, batteries, EV Chargers)^

INTRODUCING SOLAHART ENERGY MANAGEMENT SYSTEM

The smart new way to manage your energy

Solahart Home Energy Management System is an intelligent communications hub that monitors and manages your home's energy consumption and solar power generation. Detailed information about your home's energy use and generation is conveniently displayed through Solahart's atHome web App allowing you to shift loads away from expensive peak times and maximise the use of your solar energy to reduce energy costs.

Add a Solahart Home Energy Management System to any solar system

A Solahart Energy Management system can minimise your overall energy costs by storing your solar energy in a Solahart PowerStore® hot water system, or battery storage system. It also uses smart technology to intelligently control your connected appliances to make the most of your solar power or cheaper energy tariff periods.

Monitor and Control your home's energy devices

WHAT YOUR SOLAHART
HOME ENERGY MANAGEMENT SYSTEM
CAN DO FOR YOU

- ⊘ Access to Solahart's atHome web App
- ⊘ Live monitoring of your solar generation and connected appliances*
- ⊘ Monitor your home's energy costs and the contribution of solar and battery to your electricity bills
- ⊘ Automatic, intelligent system optimisation, based on weather, energy retailer plan tariff, and energy usage patterns
- ⊘ Automatically manage large devices (water heaters, batteries and electric vehicle chargers) to minimise the cost of energy
- ⊘ Remotely operate connected appliances*, such as your electric vehicle charger, via the atHome web App
- ⊘ Automatic fault alerts for managed appliances
- ⊘ Download performance reports
